- 4.2 Repair Order Invoiced
- 4.3 Sales Invoice Imported and Posted
- 4.4 Deduction Created in Alvys
- 4.5 Deduction Paid in Alvys
- 4.6 Invoice Paid
- 4.7 Split Deductions

1. Overview

This document describes how to set up and use the Fleetrock Alvys Business Central integration. The integration connects three systems:

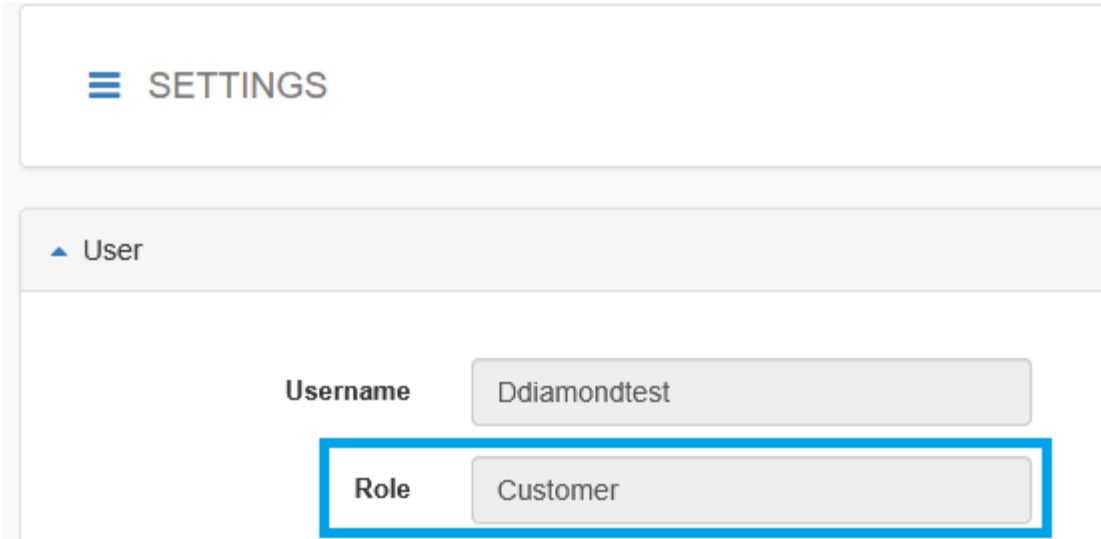

- **Fleetrock** – repair orders are created and invoiced here.
- **Business Central** – invoiced repair orders are imported as sales invoices and posted.
- **Alvys** – each posted sales invoice becomes a deduction against the owner operator's truck. When Alvys pays the deduction, Business Central posts a payment against the invoice and the repair order is marked as paid in Fleetrock.

Section 2 covers the Fleetrock setup, Section 3 the Alvys setup, and Section 4 walks through the end-to-end workflow.

2. Fleetrock Setup

2.1 Fleetrock User

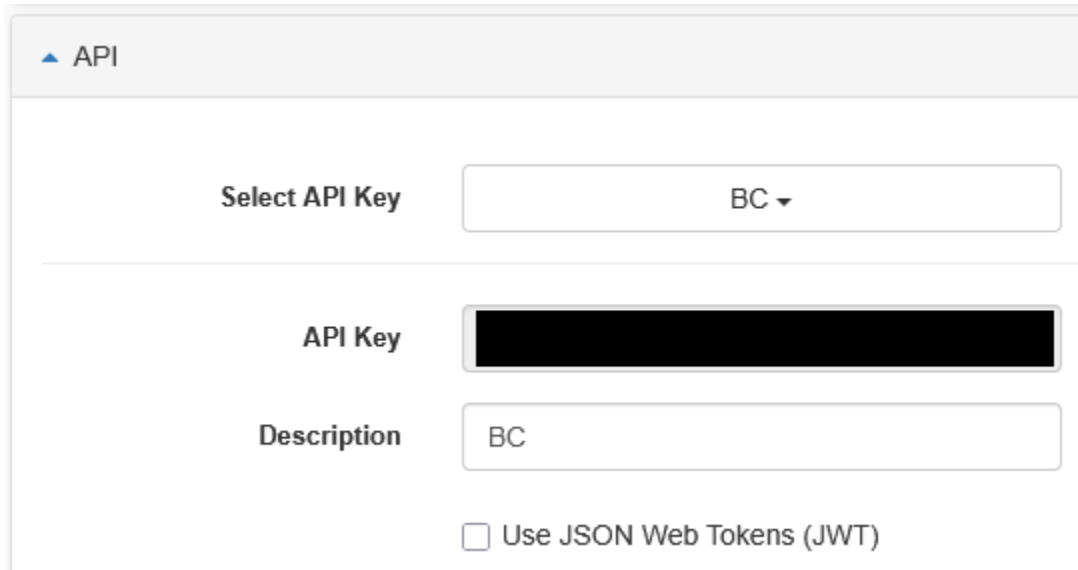

To use the integration, a user must be created in Fleetrock with the **Customer** role:

The screenshot shows the 'SETTINGS' page in Fleetrock. Under the 'User' section, the 'Username' field is set to 'Ddiamondtest'. The 'Role' field is set to 'Customer' and is highlighted with a blue border.

Figure 1: Fleetrock user with the Customer role

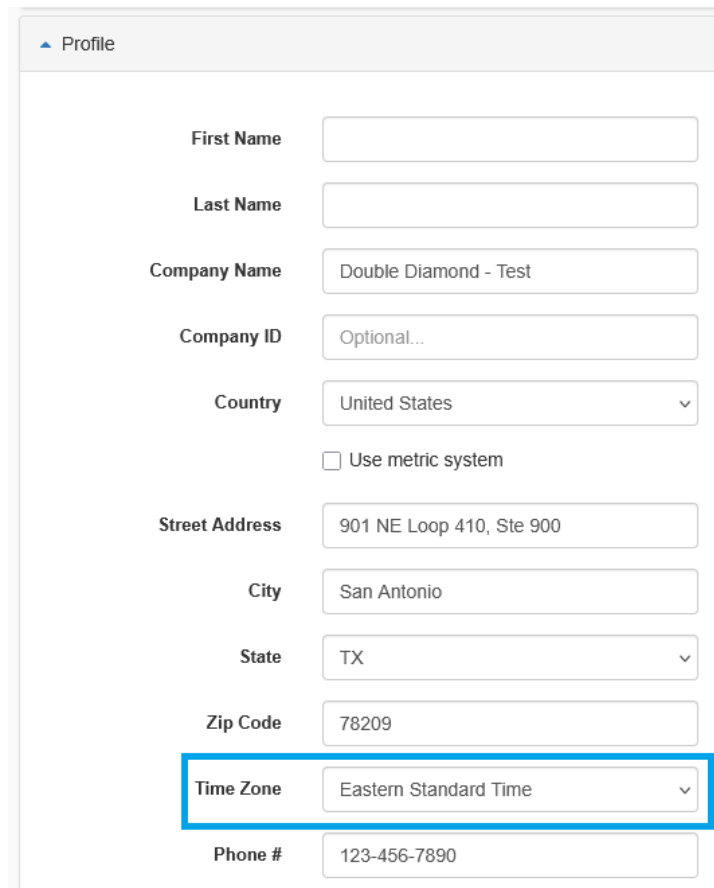

The user must also have an API key created with **Use JSON Web Tokens (JWT)** disabled:

The screenshot shows the 'API' section in Fleetrock. The 'Select API Key' dropdown is set to 'BC'. The 'API Key' field is redacted with a black box. The 'Description' field is set to 'BC'. The 'Use JSON Web Tokens (JWT)' checkbox is unchecked.

Figure 2: Fleetrock API key with JWT disabled

Under the user's Profile settings, make a note of the selected **Time Zone**. It is needed later in Business Central.

Figure 3: Fleetrock user profile time zone

2.2 Fleetrock Setup in Business Central

In Business Central, open **Fleetrock Setup** using the search function. All Fleetrock-related settings are configured on this page.

Tell me what you want to do

fleetrock setup

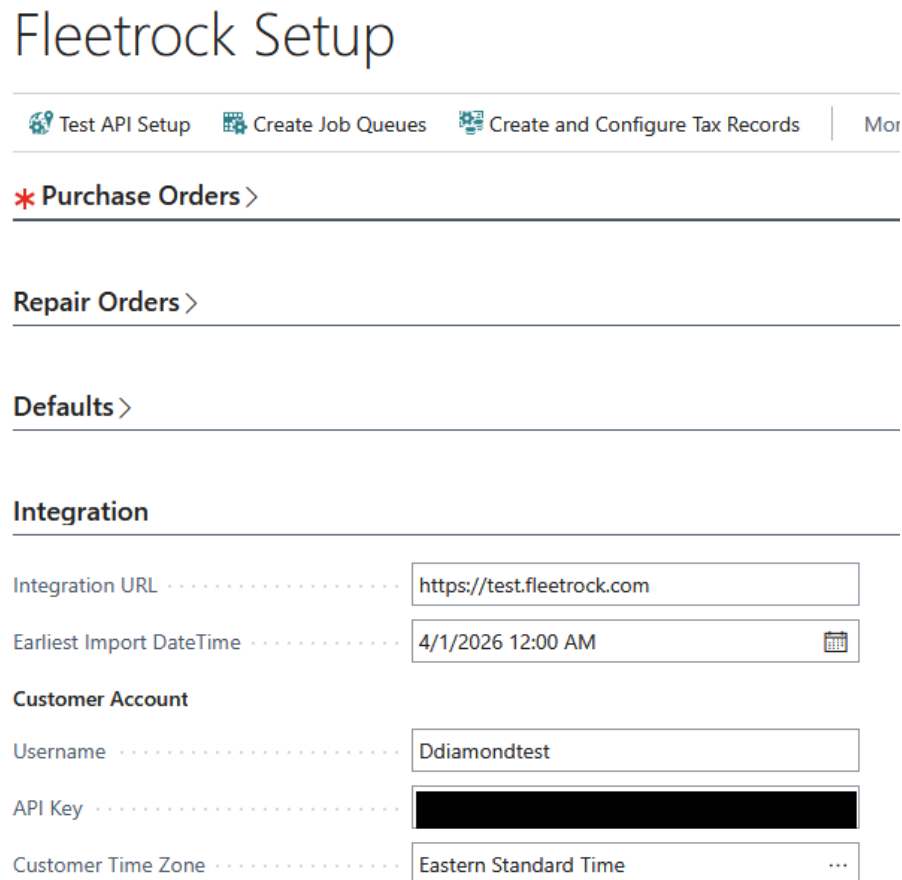

Go to Pages and Tasks

> Fleetrock Setup Administration

Figure 4: Searching for Fleetrock Setup

2.3 Integration Tab

Open the **Integration** tab of the Fleetrock Setup page:

The screenshot shows the Fleetrock Setup page with the Integration tab selected. The page has a header with navigation links: Test API Setup, Create Job Queues, Create and Configure Tax Records, and More. Below the header, there are sections for Purchase Orders, Repair Orders, and Defaults. The Integration section contains the following fields:

Integration URL	https://test.fleetrock.com
Earliest Import DateTime	4/1/2026 12:00 AM
Customer Account	
Username	Ddiamondtest
API Key	[REDACTED]
Customer Time Zone	Eastern Standard Time

Figure 5: Integration tab of the Fleetrock Setup page

Enter one of the following in the **Integration URL** field:

- Fleetrock test environment: <https://test.fleetrock.com>
- Fleetrock production environment: <https://www.fleetrock.com>

Enter the **Username**, **API Key** and **Customer Time Zone** of the Fleetrock user configured in Section 2.1.

To have the integration ignore documents dated before a certain date, enter a value in the **Earliest Import DateTime** field.

Once all the fields on the Integration tab are filled in, select **Test API Setup** at the top of the page. If the setup is correct, a message similar to the following is shown:

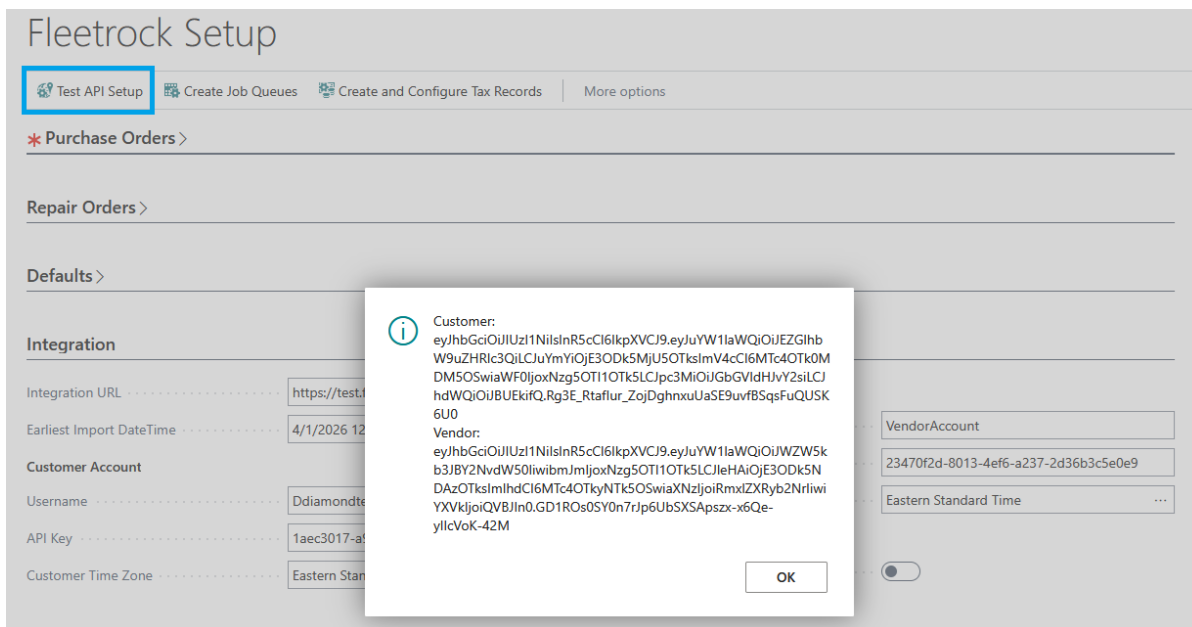

Figure 6: Successful Test API Setup

If there are problems with the setup, the errors are displayed:

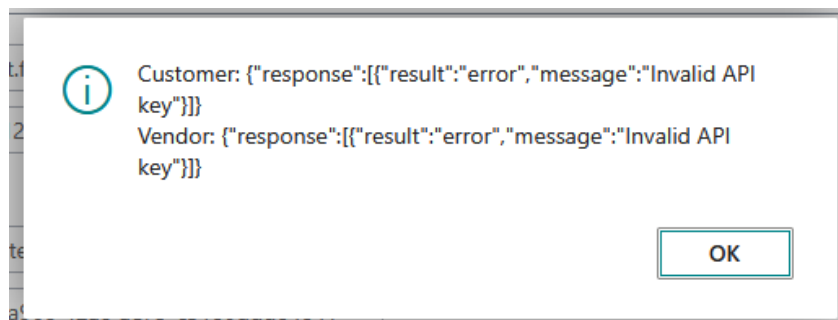

Figure 7: Test API Setup errors

2.4 Defaults Tab

Open the **Defaults** tab and select **Create and Configure Tax Records**. This creates a Tax Area and a Tax Jurisdiction, both with the code FLEETROCK, if they do not already exist, and assigns them to the related fields:

Fleetrock Setup

Test API Setup | Create Job Queues | **Create and Configure Tax Records** | More options

* Purchase Orders >

Repair Orders >

Defaults

Gen. Busi. Posting Group	DOMESTIC	Taxes	
Payment Terms	30 DAYS	Tax Jurisdiction Code	FLEETROCK
Truck Dimension Code	TRACTOR	Tax Area Code	FLEETROCK
		Labor Tax Group Code	LABOR
		Parts Tax Group Code	PARTS
		Fees Tax Group Code	FEES
		Non-Taxable Tax Group Code	NONTAXABLE

Figure 8: Defaults tab after Create and Configure Tax Records

Populate the **Gen. Bus. Posting Group** and **Payment Terms** fields.

Populate the **Labor**, **Parts** and **Fees Tax Group Code** fields with the tax groups to be used for labor, parts and fees lines on Fleetrock repair orders. Populate the **Non-Taxable Tax Group Code** with a tax group to be used on lines and orders that do not have any taxes assigned.

When a **Truck Dimension Code** is set, each asset in Fleetrock is imported as a value of that dimension and assigned to the documents imported from Fleetrock. If the field is left blank, documents are still imported, but the asset is not assigned to them as a dimension in Business Central.

2.5 Repair Orders Tab

Open the **Repair Orders** tab:

Repair Orders

Labor G/L Account No.	410092	Customer Posting Group	1DEFAULT
Parts G/L Account No.	410095	Auto-post Repair Orders	☒
Additional Fee's G/L No.	410094	Check Repair Order DateFormula	-30D

Figure 9: Repair Orders tab

- **Labor / Parts / Additional Fee G/L Account No.** and **Customer Posting Group** – used when creating sales invoices from imported repair orders.
- **Auto-post Repair Orders** – whether sales invoices created from repair orders are posted automatically when imported.
- **Check Repair Order DateFormula** – how far back to look for repair orders that should have been imported but were missed (for example, -30D).

2.6 Automatic Import

Select **Create Job Queues** to turn on the automatic import of repair orders into Business Central:

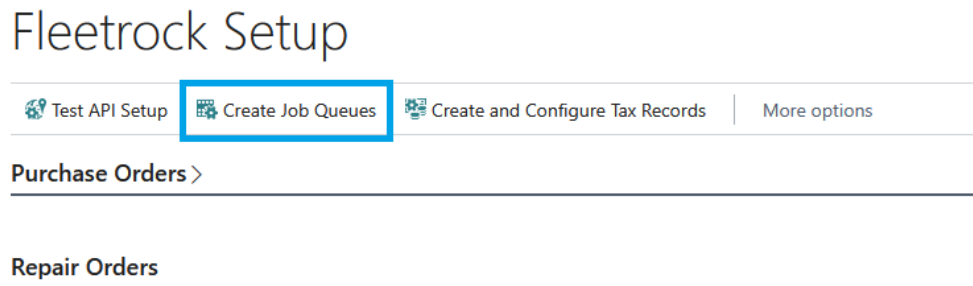

Figure 10: Create Job Queues action

A confirmation message is shown:

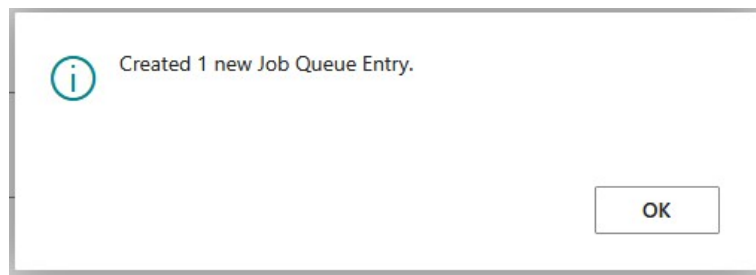

Figure 11: Confirmation message

Selecting it again does not create any duplicates.

2.7 Repair Order Processing

When a repair order is invoiced in Fleetrock, it is automatically imported into Business Central as a sales invoice. If **Auto-post Repair Orders** is enabled, the sales invoice is also posted after it is imported.

Each imported sales invoice records the number of its Fleetrock repair order in the **Fleetrock Repair Order No.** field:

Sales Invoices

Sales Invoices: All | | | | + New Manage Release | Post | Inv

Entity Code	Shortcut Dimension 2 Code	No.	Fleetrock Repair Order No. ↓	▼	Sell-to Custo
<u>DDT</u>	:	INV000000948	4627		C15636

Figure 12: Sales invoice showing the Fleetrock Repair Order No.

3. Alvys Setup

Open the **Alvys Sales Setup** page (search for it the same way as Fleetrock Setup).

3.1 Integration

Set the **Integration URL** to <https://integrations.alvys.com/api/p/v1.0/>.

Enter the **Client ID** and **Client Secret**. These are found in Alvys under **Settings** → **API Access** → **<API key>** → **Credentials**:

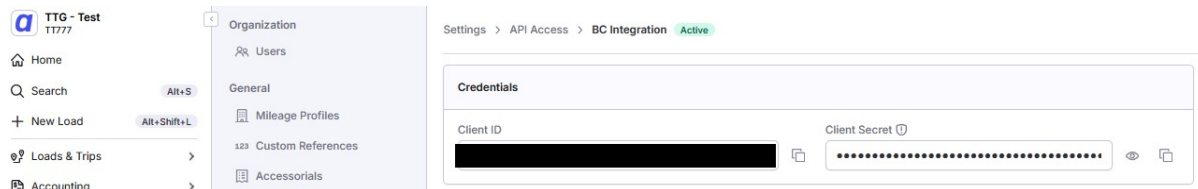

Figure 13: Client ID and Client Secret in Alvys

Alvys Sales Setup

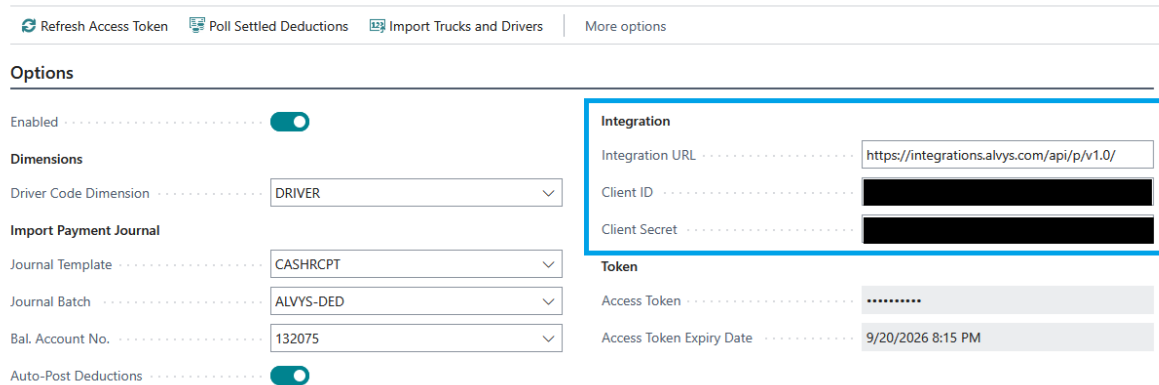

Figure 14: Alvys Sales Setup – Integration fields

Select **Refresh Access Token** to confirm the connection works. If it does, the **Access Token Expiry Date** is updated to one hour from the current time:

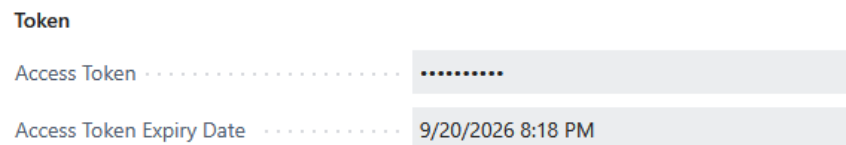

Figure 15: Access token refreshed

If the connection is not valid, an error is displayed with details of the problem:

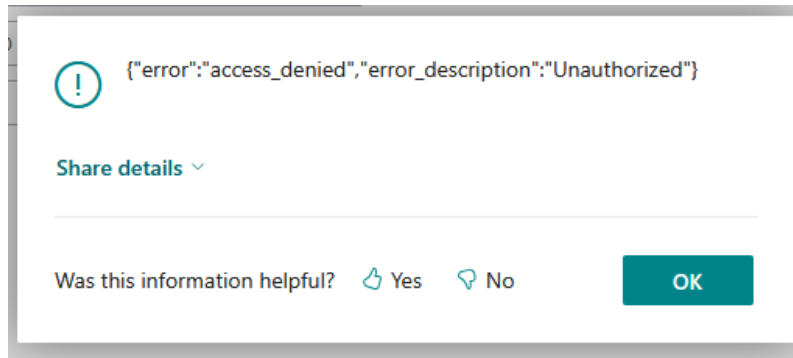

Figure 16: Connection error

3.2 Dimensions

Populate the **Driver Code Dimension** with the related dimension in Business Central for drivers.

Alvys Sales Setup

Figure 19: Bal. Account No.

Turn on **Auto-Post Deductions** if the journal lines created from Alvys deduction payments should be posted automatically after they are imported.

3.4 Enabling the Integration

Once all settings have been configured, turn on the **Enabled** field. Turning it off at any time disables the integration and prevents any further imports or postings until it is turned back on.

4. Workflow

The end-to-end workflow is as follows.

4.1 Repair Order Created in Fleetrock

A repair order is created and filled in in Fleetrock:

REPAIR ORDER #26697

Figure 24: Deduction on the truck in Alvys

4.5 Deduction Paid in Alvys

Once the deduction is marked as paid in Alvys, a journal line is created in the payment journal set on the Alvys Sales Setup page and, if Auto-Post Deductions is on, posted automatically.

Before it is posted, the journal line is applied to the posted sales invoice and given the Tractor Code dimension matching the truck in Alvys:

Figure 27: Repair order marked Paid in Fleetrock

4.7 Split Deductions

A deduction can be paid off in parts by splitting it in Alvys. Open the deduction's three-dot menu and select **Split**:

Owner Operator Invoice	Deduction	TEST420	BC Invoice TTG P...	Sep 16, 2026	\$0.00	---	---	-\$175.00		
☐	Owner Operator Invoice	Deduction	TEST420	BC Invoice TTG P...	Sep 16, 2026	\$0.00	---	---	-\$175.00	Edit
☐	Owner Operator Invoice	Deduction	TEST420	BC Invoice TTG P...	Sep 17, 2026	\$0.00	---	---	-\$175.00	Mark as Paid

☐	Owner Operator Invoice	Deduction	TEST420	BC Invoice TTG P...	Sep 15, 2026	\$0.00	---	---	-\$350.00	Delete
☐	Owner Operator Invoice	Deduction	TEST420	BC Invoice TTG P...	Sep 15, 2026	\$0.00	---	---	-\$350.00	
☐	Owner Operator Invoice	Deduction	TEST420	BC Invoice TTG P...	Sep 02, 2026	\$0.00	---	---	-\$357.88	Copy Ctrl+C

Figure 28: Split action on a deduction in Alvys

Enter the amounts of the two parts. Together they must equal the amount of the original deduction:

The image shows a 'Split Transaction' dialog box. At the top, it says 'Split Transaction' with a close button (X) on the right. Below that, it states 'Total amount is \$175.00'. The main area contains two input fields: 'Split 1 *' and 'Split 2 *'. The 'Split 1 *' field contains the value '150'. The 'Split 2 *' field contains the value '25.00'. There is a double-headed arrow between the two fields. At the bottom right, there are two buttons: 'Cancel' and 'Save'.

Figure 29: Split Transaction dialog

Splitting creates two new deductions in Alvys that total the same amount as the original deduction.

When one of the split deductions is paid, the related posted sales invoice in Business Central is updated automatically, and its **Remaining Amount** field is reduced by the amount of that deduction. Once both are paid, the Remaining Amount is zero.

The repair order is only marked as paid in Fleetrock once the Remaining Amount on the posted sales invoice is zero.
